PATENT COOPERATION TREATY

PCT

REC'D 1 4 NOV 2005

INTERNATIONAL PRELIMINARY REPORT ON PATENTIFICATION

LITY PC

(Chapter II of the Patent Cooperation Treaty)

(PCT Artcle 36 and Rule 70)

Applicant's or agent's file reference						
PH-21690-PCT	FOR FURTHER ACTION	See Form PCT/IPEA/416				
International application No.	International filing date(day/mont	h/year) Priority date (day/month/year)				
PCT/KR2004/001652	05 JULY 2004 (05.07.2004					
International Patent Classification (IPC	c) or national classification and IPC					
IPC7 C12Q 1/68 Applicant						
POSTECH FOUNDATION	et al	<u>.</u>				
This report is the international p Authority under Article 35 and t	reliminary examination report, estab ransmitted to the applicant according	lished by this International Preliminary Examining to Article 36.				
2. This REPORT consists of a tota	of 4 sheets, including	g this cover sheet.				
3. This report is also accompanied	by ANNEXES, comprising:					
a. (sent to the applicant a	nd to the International Bureau) a tota	ofsheets, as follows:				
sheets of the description, claims and/or drawings which have been amended and are the basis for this report and/or sheets containing rectifications authorized by this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions).						
sheets which su	persede earlier sheets, but which this	Authority considers contain an amendment that goes				
nekona me aisc	iosure in the international application	as filed, as indicated in item 4 of Box No. I and the				
Supplemental B	OX.	ype and number of electronic carrier(s))				
containing a sequence	listing and/or tables related thereto, i	I computer readable form only as indicated in the				
Supplemental Box rela	ting to Sequence Listing (see Section	1 802 of the Administrative Instructions).				
4						
4. This report contains indications						
Box No. I Basis of the	e report					
	Box No. II Priority					
Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability						
<u> </u>	Box No. IV Lack of unity of invention					
Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement						
Box No. VI Certain documents cited						
Box No. VII Certain defects in the international application						
Box No. VIII Certain of	oservations on the international appli	cation				
Date of submission of the demand	Date of	completion of this report				
04 FEBRUARY 200		13 OCTOBER 2005 (13.10.2005)

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.
PCT/KR2004/001652

Box	No.	Basis of the report
1.	With other	regard to the language, this report is based on the international application in the language in which it was filed, unless wise indicated under this item. This report is based on translations from the original language into the following language
· '	annes —	regard to the elements of the international application, this report is based on (replacement sheets which have been furnished receiving Office in response to an invitation under Article 14 are referred to in this reort as "originally filed" and are not seed to this report): the international application as originally filed/furnished the description: pages
4.		The amendments have resulted in the cancellation of: the description, pages
* ;	lf iten	n 4 applies, some or all of those sheets may be marked "superseded."

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No. PCT/KR2004/001652

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1.	Statement				
	Novelty (N)	Claims	1-9	YES	
		Claims	None	No	
	Inventive step (IS)	Claims	1-9	YES	
		Claims	None	NO	
	Industrial applicability (IA)	Claims	1-9	YES	
		Claims	None	NO	

2. Citations and explanations (Rule 70.7)

The following documents have been considered for the purpose of this report:

D1: WO 2000/068232 A1 (UNISEARCH LIMITED) 16 NOVEMBER 2000

D2: Bioconju. Chem., Vol. 13(6), pp. 1181-1185 (2002)

D3: Chem. Soc. Rev., Vol. 31(2), pp. 96-107 (2002)

D1 discloses a method for producing cucurbiturils, comprising mixing substituted and/or unsubstituted glycoluril with an acid and a compound forming methylene bridges between glycoluril units, and heating the mixture; and novel cucurbiturils and substituted cucurbiturils.

D2 discloses noncovalent strategy in developing a self-assembled ternary complex of cationic dendrimer, cucurbituril and DNA as a gene delivery carrier.

D3 discloses mechanically interlocked molecules incorporating cucurbituril as a molecular bead and their supramolecular assemblies.

1. Novelty & Inventive Step

Claims 1-6 relate to a cucurbituril derivative-bonded solid substrate, wherein a cucurbituril derivative of Formula (1) is covalently bonded to a modified solid substrate of Formula (2) or Formula (7). Claims 7-9 relate to a protein chip, a DNA chip and a sensor for biomaterial assay comprising the cucurbituril derivative-bonded solid substrate of claims 1-6.

(Continued on Supplemental Sheet.)

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/KR2004/001652

Supplemental Box

In case the space in any of the preceding boxes is not sufficient. Continuation of:

Box No. V

The technical feature of the present invention is the covalent bonding between the cucurbituril derivative of Formula (1) and the modified solid substrate of Formula (2) or Formula (7).

However, none of the prior art documents discloses a cucurbituril derivative-bonded solid substrate with the covalent bonding between a cucurbituril derivative of Formula (1) and a modified solid substrate of Formula (2) or Formula (7).

Said cucurbituril derivative-bonded solid substrate of this invention enables immobilization of proteins on a surface of the solid substrate via a non-covalent bond with a very strong coupling constant and gives no damage to active sites of proteins preparing a protein chip using said solid substrate. Thus, the cucurbituril derivative-bonded solid substrate would not have been obvious to a person skilled in the art from the disclosure of D1-D3.

Therefore, claims 1-9 meet the requirements of novelty and inventive step under PCT Article 33(2) and 33(3).

11. Industrial Applicability

The subject matter of claims 1-9 is considered to be industrially applicable under Article 33(4). //
